Central Eastern Europe

Project Opportunities for CEE countries

European Trade Union Committee for Education

ETUCE

9/1/2013

Following the positive feedback from the ETUCE member organisations at the last CEE-Roundtable in Kiev in 2011, the ETUCE Secretariat has updated the brochure on project opportunities for CEE countries. This publication intends to guide the member organisations of ETUCE in the Central Eastern European area through some of the funding opportunities within the framework of the European Union, as well as other funds dedicated to this particular area.

As Europe is shaken by economic and financial crises and governments are using the crises to undermine social dialogue systems and austerity measures as an excuse to implement budget cuts in education, the European social model seems to be under attack. At the same time, the European Union is committed to creating more and better jobs and a socially inclusive society. These goals are at the core of the [Europe 2020](#) strategy for generating smart, sustainable and inclusive growth in the EU. The various funding opportunities of the EU and other organisations play an important role in meeting Europe's goals, and in mitigating the consequences of the economic crisis – especially the rise in unemployment and poverty levels.

There is a great variety in the nature, size and aims of European projects and funding opportunities, and they address a wide variety of target groups. To name only a few, projects can aim at education systems, teachers and students; at access to employment and job retention, young and older job-seekers; language learning, the fight against discrimination, better working conditions and to promote social dialogue. The indicatives aim to inspire enhanced cohesion and further solidarity among the various stakeholders and actors in society, showing that participation at local, regional, national and European level is important.

In accomplishing these targets, education is an important area in which a great effort must be made. The modern school systems are facing the challenge to adapt to the increasing diversity of the student body to deliver high-level education for all. To achieve this, the European Commission recognizes in line with ETUCE's priorities that teachers and other education staff need to receive training.

This brochure is to be understood as a first guide to European funding opportunities for CEE countries and by no means pretends to be comprehensive. It rather wishes to inspire ETUCE member organisations in their search for funding for their manifold projects and actions and to encourage them to make best use of the large variety of European funds available.

Programme	European Neighbourhood Policy and Strategic Partnership
About	<p>The EU has a coherent European Neighbourhood Policy to direct relations with its eastern and southern neighbours. A Strategic Partnership based on four Common Spaces is the framework for relations with Russia, which is not part of the ENP. The European Neighbourhood Policy and Strategic Partnership are financed through a single instrument - the European Neighbourhood and Partnership Instrument (ENPI)¹⁷. It is designed to target sustainable development and approximation to EU policies and standards - supporting the agreed priorities in the ENP Action Plans, as well as the Strategic Partnership.</p> <p>The ENP is a broad political strategy which has as the ambitious objective of strengthening the prosperity, stability and security of Europe's neighbourhood in order to avoid any dividing lines between the enlarged EU and its direct neighbours. The ENPI is the financial instrument which supports the ENP through concrete assistance actions.</p>
Application countries	Algeria, Armenia, Azerbaijan, Belarus, Egypt, Georgia, Israel, Jordan, Lebanon, Libya, Moldova, Morocco, Palestinian Authority, Syria, Tunisia, Ukraine and the Russian Federation
Stakeholders	The ENP, which is mainly a bilateral policy between the EU and each partner country.
Objectives/description of actions	<p>Cooperation with countries of the Eastern Neighbourhood and Russia will focus on: transport; energy; sustainable management of natural resources; border/migration control; socio-cultural relations; and dealing with abandoned munitions and landmines.</p> <p>The strategic partnership between the EU and Russia lies on the long term four 'common spaces' in the framework of the Partnership and Cooperation Agreement and on the basis of common values and shared interests. These cover the following issues:</p> <ol style="list-style-type: none"> 1. The Common Economic Space, covering economic issues and the environment 2. The Common Space of Freedom, Security and Justice; 3. The Common Space of External Security, including crisis management and non-proliferation; 4. The Common Space of Research and Education, Including cultural aspects. <p>Cooperation with neighbouring Mediterranean countries will prioritise the</p>

	<p>spheres of justice, security and migration; sustainable economic development; and socio-cultural exchanges.</p> <p>Around 90% of ENPI funds are used for bilateral actions, i.e. country-specific initiatives and for regional actions involving two or more partner countries. The remaining 10% are reserved for specific new areas of joint activity, namely <u>cross-border co-operation</u> (CBC), and specific initiatives like the <u>Neighbourhood Investment Facility</u> (NIF).</p> <ol style="list-style-type: none"> 1. Under the CBC, the ENPI finances joint programmes, bringing together regions of Member States and partner countries sharing a common border. 2. The introduction of a Governance Facility which provides resources to creative partners which have shown the will to carry forward essential reforms related to improving good governance. 3. The <u>Twinning</u>, the <u>TAIEX</u> (Technical Assistance and Information Exchange) and the <u>SIGMA</u> (Support for Improvement in Governance and Management) instruments. The first two can be defined as a cooperation tool between a public administration in a partner country and the equivalent institution in an EU Member State. The third one, SIGMA, is a joint initiative of the OECD and the EU. These instruments aim to upgrade and modernise the institutions of the beneficiary eastern and southern neighbouring countries.
